LinkedIn: linkedin.com/in/priyanshu-mullick-0853282a1 | GitHub: github.com/Priyanshu-2409 |

Full-stack + AI engineer building shippable products.

Three production-grade projects (AI meeting assistant with Hindi/Hinglish transcription, cloud-native API uptime monitor, LLM code-doc generator) · 300+ DSA problems in Java · Shipped a live e-commerce site during a 3-month internship.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Professional Studies, New Delhi

Expected June 2027

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.9 / 10

Class XII (CBSE): 81.8% | Class X (CBSE): 93.8%

Relevant Coursework: DSA, System Design, DBMS, Operating Systems, Computer Networks, OOP

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Zustand, Vite

Backend: Node.js, Express.js, REST APIs, Microservices, JSP, Servlets, Better Auth

Databases: PostgreSQL, MySQL, MongoDB, Redis, Vector Databases (ChromaDB)

AI / GenAI: LangChain, Anthropic Claude API, OpenAI API, Groq, Mistral, RAG, Agentic AI, NLP, Prompt Engineering

Cloud, DevOps & Tools: Docker, Vercel, Railway, Git, GitHub, Linux, CI/CD, Agile, Prisma, BullMQ, Turborepo, Postman, VS Code

EXPERIENCE

Urofly International — Full Stack Web Developer Intern

June 2025 – September 2025

- Developed and maintained uroflyintl.com to live customer traffic over a 12-week Agile cycle by architecting the end-to-end stack (Next.js 15, TypeScript, Node.js, PostgreSQL) as a core contributor.
- Delivered browse, cart, and checkout flows responsive across mobile, tablet, and desktop by building a reusable React + TypeScript component system with Tailwind CSS, shadcn/ui, Zustand, and Vite.
- Powered the full catalog → cart → checkout order lifecycle for a live storefront by designing RESTful APIs on Node.js/Express against a normalized PostgreSQL schema with auth and transactional integrity.
- Delivered fast, SEO-friendly product pages verified via Lighthouse audits by implementing Next.js SSR/ISR and deploying with GitHub-based CI/CD for continuous production releases.

Techsharks Internet Services Pvt. Ltd. — Full Stack Web Developer Intern

July 2024 – August 2024

- Shipped multiple client-facing websites end-to-end following Agile sprint cycles by building full-stack features across React, Next.js, Node.js, Express, TypeScript, and Tailwind CSS alongside senior engineers.
- Reduced design-to-code handoff time by pairing directly with designers to translate Figma mockups into pixel-accurate, responsive React components validated across mobile, tablet, and desktop breakpoints.

PROJECTS

AI Meeting Assistant with Hindi/Hinglish Transcription + RAG Chat (Viora) github.com/Priyanshu-2409/viora

Python, Whisper AI, Sarvam AI, LangChain, ChromaDB, RAG, Agentic AI, LLMs, Speech-to-Text, NLP

- Built an end-to-end AI assistant that ingests YouTube URLs and audio/video files, transcribing English via local Whisper AI and Hindi/Hinglish via Sarvam AI.
- Engineered an agentic AI pipeline on LangChain that autonomously extracts summaries, action items with owners and deadlines, key decisions, and follow-up questions.
- Implemented a Retrieval-Augmented Generation (RAG) layer on ChromaDB for natural-language chat over meeting transcripts; exports full reports as PDF or TXT.

Cloud-Native API Uptime Monitor with BullMQ Workers (Pharos) github.com/Priyanshu-2409/pharos

Next.js 15, Express, TypeScript, PostgreSQL, Prisma, Redis, BullMQ, Better Auth, Turborepo, Docker

- Architected an open-source cloud-native monitoring platform to track uptime and integration health across distributed API endpoints, scaffolded as a Turborepo monorepo with separate web and worker services.
- Engineered a scalable background job system using BullMQ on Redis to schedule recurring asynchronous health checks, decoupling execution from the API server for horizontal scalability.
- Designed a normalized PostgreSQL schema with Prisma ORM and integrated Better Auth for secure authentication.

LLM Code Documentation Generator with SHA-256 Cache (Devscribe) github.com/Priyanshu-2409/devscribe

Next.js, TypeScript, Anthropic Claude API, PostgreSQL, Prisma, Tailwind CSS

- Built a GenAI developer tool leveraging the Anthropic Claude API with prompt-engineered templates to auto-generate JSDoc/docstring comments and README files across multiple programming languages.
- Implemented a SHA-256 content-hash cache in PostgreSQL to eliminate redundant LLM API calls, cutting latency and cost.

BEYOND CODE

Core organizer, Hack-n-Chill 2026 at ADGIPS (built the event site) · GDGC ADGIPS Core Team Member

300+ DSA problems in Java on LeetCode / HackerRank / CodeChef ·
